

## Container and Pluggable databases – Part3

### Create a pluggable database Anuj from PDB\$SEED

Source CDB: CDB1

Source PDB: Anuj

#### Procedure:

##### **Creating an PDB (Anuj) from PDB\$SEED**

1. Set db\_file\_name\_convert

```
SQL> alter system set PDB_FILE_NAME_CONVERT ='/u01/datafiles/pdbseed/', '/u01/datafiles/Anuj/'  
scope=both;
```

2. Run create pdb command

```
SQL> CREATE PLUGGABLE DATABASE Anuj ADMIN USER PDB_Anj IDENTIFIED BY PDB_Anj default  
tablespace users datafile '/u01/datafiles/Anuj/users_01.dbf' size  
1000M;ROLES=(DBA);
```

3. Open PDB in read write mode

```
SQL> alter pluggable database Anuj open;
```
